

Introduction & scope of the workshop

Mubela Mutale & Sarrvesh S. Sridhar

University of Hertfordshire & ASTRON.

July 01, 2019

Current radio telescopes/observatories

- An incomplete list of all radio telescopes/observatories across the globe.
- How do you choose the facility that meets your science needs?

Arrays like LOFAR and the VLA are represented by a single point.

Introductions & scope of the workshop

- 1 Why do we need radio interferometry?
- 2 How to calibrate and make an image out of radio inteferometry data?
- 3 Modern radio telescopes
- 4 How to write a proposal?
- 5 Learn to use data archives
- 6 Learn to use visualization and scripting tools

Introductions & scope of the workshop

- 1 Why do we need radio interferometry?
- 2 How to calibrate and make an image out of radio inteferometry data?
- 3 Modern radio telescopes
- 4 How to write a proposal?
- 5 Learn to use data archives
- 6 **Learn to use visualization and scripting tools**
